Zoo-A-Logical Math Junior: A Mathematical Challenge Between Humans and the Rest of the Animal World (Paperback)

By Thomas Kearney

Dog Ear Publishing, United States, 2013. Paperback. Book Condition: New. 277 x 213 mm. Language: English . Brand New Book ***** Print on Demand *****.The inspiration for this book began when I was teaching a high school class called Animal Behavior. This was an elective Science class that combined Biology, Zoology, Psychology, and Sociology. During the course we would talk about a variety of different animals and the different behaviors that they would exhibit. One of the goals that I would always try to do is show the students how amazing or truly unbelievable some of these animals really were. People very seldom think of themselves as being a part of the animal world, and when we do we only think of how we are so superior to all of the rest. I soon realized that when I put the math to some of these human-animal comparisons, it was as if a whole new window opened up to the World of Animals. These math problems showed us just how awe inspiring animals really are.
